Loadrite L5000

Loadrite L5000

The next generation of onboard weighing systems inspired by smart devices.

Stay on top of every load using the powerful new Loadrite L5000 wheel loader scale. With a modern and easy-to-use interface, built-in connectivity and best-in-class weighing, you can maximize every load with accurate data you can count on.

Connect machines, people and the office to make bulk material handling management easier, safer, and more efficient. Capture activity and enable performance improvements with real-time insights and streamlined ticketing capabilities. The L5000 is the ultimate choice for any bulk material handling operation.

ON A SLOPE

ON THE MOVE

Performance made simple.sm

Intuitive Interface

Simple user interface for easier operation, enabling the operator to concentrate on what they do best: loading trucks.

Built to Connect

Built-in communication functions such as cellular, Wi-Fi and GPS make it easy to improve operations and monitor loader movements.

Superior Accuracy

The most accurate loader weighing system on the market, offering precise weighing in more conditions.

Right Product. Right Customer. Right Amount.

Large 7" touch screen for better visibility and faster navigation

Day Mode and Night Mode to suit your loading environment

Monitor performance in-cab by comparing actual loads to targets

Achieve daily targets by reviewing loading broken down by products, customers and more

Ticket Your Way

Ticket the way that works for your operation. Get a hard copy printed directly from the loader or send the load ticket to a remote printer at the gate to collect on departure.*

Digitize your tickets and never lose one again with eTickets. Send load tickets or load summaries directly to any email address, removing the need for truck drivers to exit the cab and enabling faster truck turnaround.

* Requires an LP950 for in-cab printing and LG500 Gateway for remote printing

InsightHQ (Optional)

With built-in WiFi and GPS, the L5000 is InsightHQ ready. Get production and performance metrics clearly presented in a simple dashboard. Visualize activity in real time or play back the shift to improve productvity. See daily totals or totals per loader to track progress against targets and take action. With customizable transaction reports you can get a summary as well as detailed transactions for each customer. Access your real time stockpile inventory from your smart device anywhere, anytime.
